DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: Independent claims 1 and 16 are allowable over the prior art of record since the cited references taken individually or in combination fail to disclose creating or accessing a menu for audio content within a portable audio playback device without a display, with stored audio tracks being clustered in a plurality of clusters, and a navigation system having not more than three buttons, or one button with three functions, wherein one button is for 'Switch to a Near Cluster', one button is for 'Switch to a Distant Cluster', and one button is for 'Switch to another track from the Current Cluster', wherein the audio tracks are classified in clusters as claimed with the medoid being selected as the representative track of the cluster, a reproducible audio extract generated from said track, and said audio extract associated as representative of the cluster to the menu list. The closest prior art of record Orbador (US 7,149,755) discloses classifying or organizing audio tracks into groups or clusters for browsing, however does not disclose the specific clustering implementation as claimed and further does not disclose the specific navigation system as claimed in a portable audio playback device without a display. Therefore, Orbador and likewise the other references of record do not disclose the above patentably distinct combination of limitations as recited in independent claims 1 and 16 and it would not have been obvious to one of ordinary skill in the art at the time of the invention to modify the prior art to include all the limitations of independent claims 1 and 16 as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
